Internet Censorship

Freedom not Fear!

Mass Surveillance

You don't have anything to hide? Your relationship, your health, your children, your finances or youthful folly. Isn't it your personal decision with whom you share this information? Your right to privacy is in **grave danger!**

The Austrian Security Police Act

The police is authorized, **without approval of a court**, to track the location of your mobile phone (and eavesdrop on you), read your e-mails, and store that data for up to 20 years. Even if you are not suspected for a crime!

Video Surveillance

In council housing, at work, at school or in the subway. Many areas of your life are monitored by cameras. **What crime have you committed?** What do you need to be watched for?

Internet Censorship

Do we want to live in China or Iran? Are we only allowed to read what the state permits us to? We are free people and can decide for ourselves! **Internet censorship in Austria must be stopped!**
